2 Basis of preparation

a) Statement of compliance

They do not include all of the information required for full annual consolidated financial statements, and should be read in conjunction with the annual consolidated financial statements as at and for the year ended 31 December 2019, which have been prepared in accordance with International Financial Reporting Standards (IFRS).

b) Basis of measurement

The condensed consolidated interim financial information has been prepared on the historical cost basis except for the following which are measured at fair value:

i) available-for-sale investments ("AFS"); and

ii) financial assets at fair value through profit or loss ("FVTPL").

c) Functional and presentation currency

These condensed consolidated interim financial information are presented in U.A.E. Dirhams ("AED") rounded to nearest the thousand, since that is the currency in which the majority of the Group's transactions are denominated.

2 Basis of preparation (continued)

d) Use of estimates and judgments

The preparation of condensed consolidated interim financial information in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expense. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future period affected.

In preparing these condensed consolidated interim financial information, the significant judgments made by management in applying the Group's accounting policies and estimation of key sources of uncertainty were the same as those that applied to the audited annual consolidated financial statements as at and for the year ended 31 December 2019 except the following estimates and judgements which are applicable from 1 January 2020.

e) Impact of COVID-19

On 11 March 2020, the World Health Organization ("WHO") officially declared COVID-19 a global pandemic. In light of the rapid spread of COVID-19 across the globe, various economies and sectors have faced significant disruptions and uncertainty and governments and authorities have instigated a host of measures to contain the spread of the virus.

This note outlines the steps taken by the Group to estimate the impact of COVID-19 and the judgements applied by management in assessing the values of assets and liabilities as at 30 June 2020.

Insurance risk

In its underwriting segment, the Group is primarily exposed to medical and business interruption policies. The Health Authority in Dubai has instructed all insurers to accept medical claims related to COVID-19 irrespective of cover terms and conditions. The Group anticipates that the impact of medical claims would be immaterial due to low rate of hospitalisation and deferral of elective medical procedures required.

With regards to Business Interruption (BI) policies, the Group has in place pandemic and infectious disease policy exclusions as well. The Group has evaluated all business interruption policies in force for which the Group may have to incur claim payouts. As a result of initial examination of the policies, the Group has determined that these will not have a material impact in relation to the net claims paid due to specific policy exclusions and the support from its reinsurers. Furthermore, the Group has been able to retain major customers during the six-month period ended 30 June 2020 and has generally witnessed renewals and new business across major lines of businesses.

Credit risk

The Group has robust governance in place to ensure the appropriateness of provision against doubtful insurance balance receivables and the resultant estimates are being reviewed continuously by the management.

For the six-month period ended 30 June 2020, the Group has used specific measures to assess probability of impairment and possible defaults or delay in collection or payment of outstanding debts.

Liquidity risk management

In response to COVID-19 outbreak, the Group continues to monitor and respond to all liquidity requirements that are presented. The Group continues to calibrate stress testing scenarios to current market conditions in order to assess the impact on the Group in the current extreme stress. As at the reporting date the liquidity position of the Group remains strong and is well placed to absorb and manage the impacts of this disruption.

Notes to the condensed consolidated interim financial information (continued)

3 Significant accounting policies

The Group has consistently applied the accounting policies as applied in the annual consolidated financial statements for the year ended 31 December 2019.

4 Financial risk management

Aspects of the Group's financial risk management objectives and policies are consistent with those disclosed in the annual audited consolidated financial statements for the year ended 31 December 2019.

5 Interim measurement

The nature of the Group's business is such that income and expense are incurred in a manner, which is not materially impacted by any form of seasonality. These condensed consolidated interim financial information were prepared based upon an accrual concept, which requires income and expense to be recorded as earned or incurred and not as received or paid throughout the period. However, the results may not represent a proportionate share of the annual profits due to variability in contributions and investment income and uncertainty of claims occurrences.

6 Investment in an associate

The investment in an associate represents a 35% (2019: 35%) interest in Orient UNB Takaful PJSC, a public shareholding company registered and incorporated in UAE. The associate commenced its commercial operations in 2017. The principal activity of the associate is issuance of short term takaful contracts in connection with accidents and liabilities insurance, fire insurance, transportation risk insurance, other type of insurance and health insurance. The associate also invests its funds in deposits.

The Company may resolve to discontinue such transfers when the reserve totals 25% of the paid up share capital. The Company has resolved not to increase the statutory reserve above an amount equal to 25% of it's paid up capital. The reserve can be used for any purpose to be decided by the shareholders upon the recommendation of the Board of Directors.

- Legal reserve

No transfer has been made during the six month period to 30 June 2020, as this will be based on the results for the year.

For Oman operations, an amount equal to 10% of the outstanding claims (Non-life) for the year and 1% of gross premiums for life assurance is transferred to a contingency loss reserve to ensure that the Company has sufficient solvency to meet exceptional, non-recurring claims which may arise in future years for the Oman branch.

- General reserve

Transfers to the general reserve are made on the recommendation of the Board of Directors. This reserve may be used for such purposes as deemed appropriate by the Board of Directors.

- Available-for-sale (AFS) investments reserve

At 30 June 2020, guarantees, other than those relating to claims for which provisions are held, amounting to AED 38,300 thousand (2019: AED 50,644 thousand) had been issued on behalf of the Group by its banker in the ordinary course of business.

19 Fair value of financial instruments

Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Group has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the Group measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Group uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

The Group measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

Level 1: Inputs that are quoted market prices (unadjusted) in active markets for identical instruments.

Level 2: Inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.

Level 3: Inputs are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments but for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.
